👤 PROFILE

Specializing in Data Science and Business Analytics with a strong foundation in computing. Passionate about transforming large-scale data into secure, real-time insights and trainable datasets.

🎓 EDUCATION

2024 – 2026	MSc in Data Science and Business Analytics Asia Pacific University of Technology and Innovation (APU / APIIT) 🔗 Data Engineering
2022 – 2023	B.Sc (Hons) in Computing University of Gloucestershire 🔗 Software Engineering
2018 – 2020	HND in Computing iNet College 🔗

🔧 SKILLS

- Python for Data Processing
- Data Streaming & Orchestration
- Business Analytics
- SQL and Database Management
- Machine Learning
- Data Pipeline Optimization
- ETL Transformation
- Real-time Analytical Dashboard
- Cloud Platforms (AWS, Google Cloud)
- IoT & Edge Computing

💼 PROFESSIONAL EXPERIENCE

2020 – 2021 Mandalay, Myanmar	.Net Developer iNet College • Built a C# desktop application using DevExpress. • Applied database optimization and best practices for clean code architecture.
----------------------------------	--

📁 PROJECTS

Real-Time Cold Chain IoT Data Pipeline

- Architected and deployed a four-layer IoT solution for real-time tracking and environmental monitoring of logistics vehicles.
- Developed a scalable processing layer using Node-RED to parse high-frequency JSON payloads and route data to a high-performance InfluxDB time-series backend.
- Engineered real-time dashboards in Grafana, implementing historical trend analysis and geomapping for live route tracking.
